EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Martin Fessenmaier on 6/11/2008.

The application has been amended as follows:

1. (currently amended) A hammock stand comprising four legs, four support rods to which a hammock is coupled, and a pair of cross braces, each pair comprising a first and second cross brace that are rotatably coupled to each other via a point of rotation that is in the middle of each cross brace, wherein the legs and the support rods are coupled to each other on respective ends of the hammock stand via respective cross braces such that the cross braces, without being uncoupled from the legs and support rods and upon folding of the hammock stand produce a movement in which two of the four legs approximate each other in a front-to-back and side-to-side motion as two of the support rods pivot towards each other, and wherein a second of the four legs is coupled to a first of the support rods via a connector rod that releasably engages with the first of the support rods and forms an obtuse angle with the second of the four legs when the hammock stand is in an open configuration.

Art Unit: 3673

21. (currently amended) A hammock stand comprising four legs, four support rods to which a hammock is coupled, and a pair of cross braces, each pair comprising a first and second cross brace that are rotatably coupled to each other via a point of rotation that is in the middle of each cross brace, wherein the legs and the support rods are coupled to each other on respective ends of the hammock stand via respective cross braces such that the cross braces, without being uncoupled from the legs and support rods and upon folding of the hammock stand produce a movement in which two of the four legs approximate each other in a front-to-back and side-to-side motion as two of the support rods pivot towards each other, wherein a second of the four legs is coupled to a first of the support rods via a connector rod, wherein the pair of cross braces are rotatably coupled to each other, and wherein at least one of the cross braces is rotatably coupled to a first of the four legs, and rotatably coupled to a third of the support rods.

2. The following is an examiner's statement of reasons for allowance: the closest prior art of record is considered Wu (US 6,467,109). Wu teaches a hammock stand comprising four legs and four support rods, but does not teach a *pair of cross braces, each pair comprising first and second cross braces that are rotatably coupled to each other via a point of rotation that is in the middle of each cross brace*. Accordingly, the claims overcome the prior art of record, making claims 1-3, 6-14, and 21 allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 3673

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
